

## Power Switch SC24-230 Adapter for actuators to 230V

### Short facts:

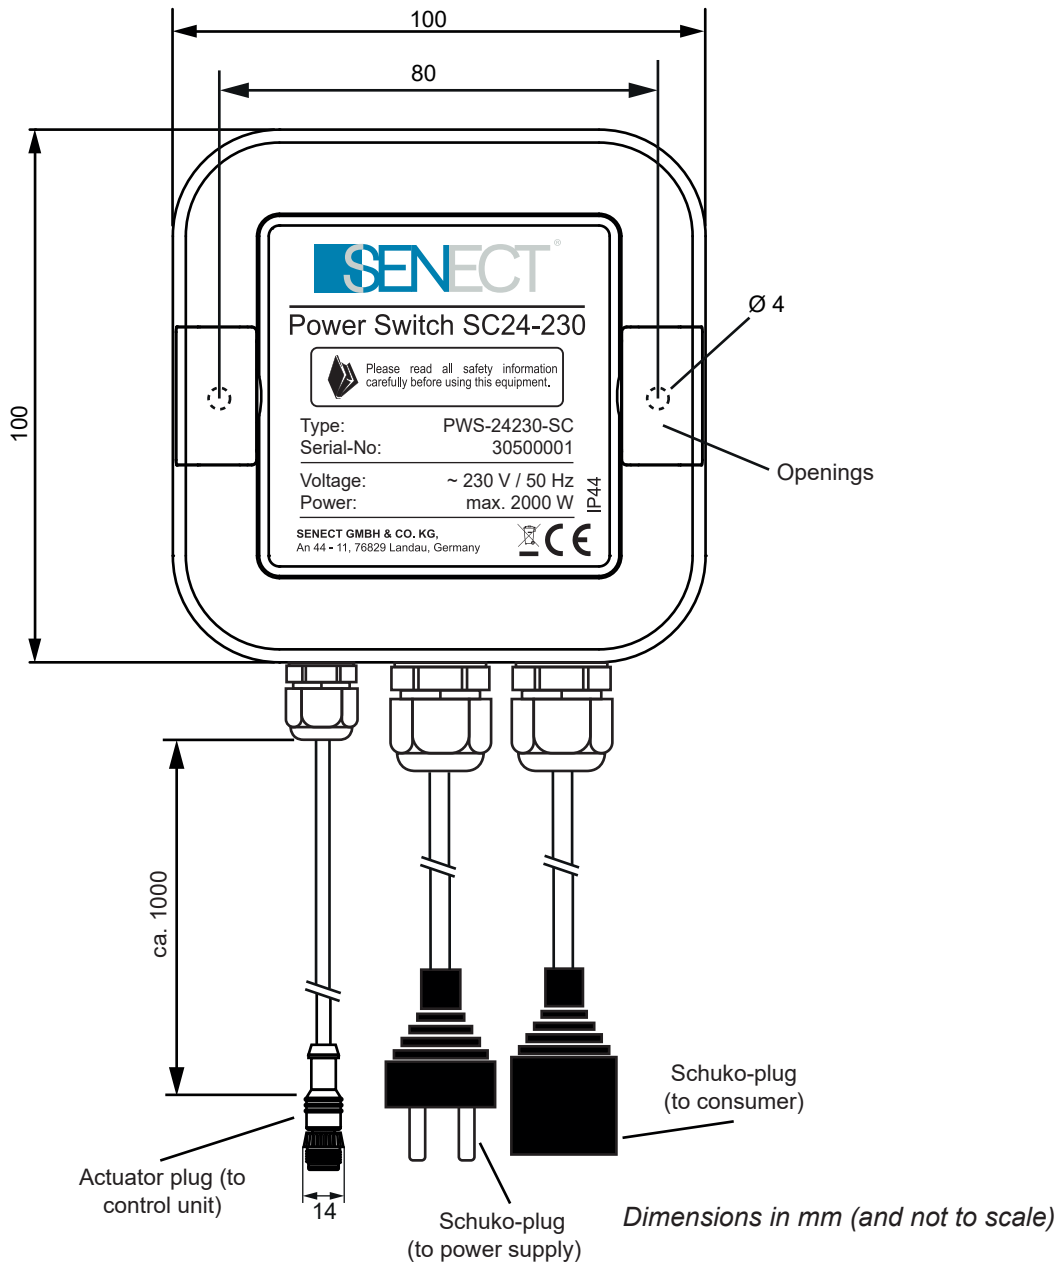

- To switch 230 V AC with actuator output ports
- For max. 2000 W consumers
- With Schuko-IP44 plugs

### **Maximizing output power - switching 230 V consumers with the Power Switch SC24-230.**

The SENECT Power Switch SC24-230 can be used to switch 230 V consumers on and off via the SENECT actuator output ports of SENECT control units.

This enables for example the use of 230 V oxygen generators with the SENECT|ONE or to maximise the functionality of the AQUACULTURE|CONTROL to switch up to eight 230 V consumers.

Technical information	
Dimensions (housing)	125 x 100 x 40 mm
Material (housing)	ASA
Plugs	230 V AC Schuko
Operating Temperature	0°C to +40°C
Power consumption	< 2 W
Cable length	each 1 m
Compatibility	with all Senect actuator outputs
Ingress protection	IP 44

PWS-SC24-230 001-002 EN Version: 1.0 Status: released, subject to alterations

Art.-No.	Item	Scope of delivery
